hmm. Who's the author?

I think that makes sense. I guess the analysis did not include evaluation of cases in categories of increasing formaldehyde?

Subject: another study

found a 2009 and a 2011 study (that may be related) on allergy (atopic dermatitis) and atopic asthma and formaldehyde: case-control, Korea. Measured formaldehyde in homes, and compared distribution in cases and controls.

Ex. 5 Deliberative Process (DP)

I'm adding these studies into the synthesis, and thought that's all I would have to do, but

Ex. 5 Deliberative Process (DP)

Should I add this into the candidate reference list?

Glinda

(a minor detail; I can't tell how long the sampling period was in the homes, but it's recent enough I should be able to get that info from the author)
